

Submit a text file with the appropriate extension (e.g. .py, .c, etc) that contains your code.

Python 3

```
print("Greetings", input())
```

Python 2

```
print "Greetings", raw_input()
```

C++

```
#include <iostream>
using namespace std;

int main()
{
    string name;
    cin >> name;
    cout << "Greetings " << name << endl;
}
```

C

```
#include "stdio.h"

int main()
{
    char name[101];
    scanf("%s", name);
    printf("Greetings %s\n", name);
}
```

Haskell

```
main = do
    name <- getLine
    putStrLn $ "Greetings " ++ name
```

We use the Haskell 2010 standard.

Java

```
import java.util.Scanner;

public class Main {
    public static void main(String[] args) {
        Scanner scan = new Scanner(System.in);
        System.out.println("Greetings " + scan.next());
    }
}
```

Make sure you use "Main" as the class name. Don't define any packages.
